

Project Training Workshop

Before any project starts it is important the project team understands the contract and key requirements, including amendments, to ensure the project runs as smoothly as possible.

Prior to the workshop we will review the contract and relevant documents and then develop a tailored workshop for your team focusing on the particular contract. It will be held at a time and place convenient for your team.

The workshop will cover such issues as:

- Design responsibility;
- Payment;
- Managing change;
- Variations
- Extensions of time;
- Compensation events;
- Notices to serve;
- Records to keep;
- Onerous clauses and obligations to watch out for;
- Documents and warranties needed.

The aim of the workshop will be to identify key risks and how to manage them, as well as identifying any pitfalls and how to avoid them

How long will it last?

The workshop lasts between half a day and a day depending upon the extent of the contract and related issues.

How many should attend?

It is entirely up to you, it could be those directly involved in the contract as well as those who wish to gain training on particular issues.

Questions?

Can we ask questions? Of course; this is your day. It provides your team with an opportunity to discuss important issues from their perspective.

Venue

The workshop can be at your office or an external venue of your choice.
